Ideation Phase
Empathize & Discover

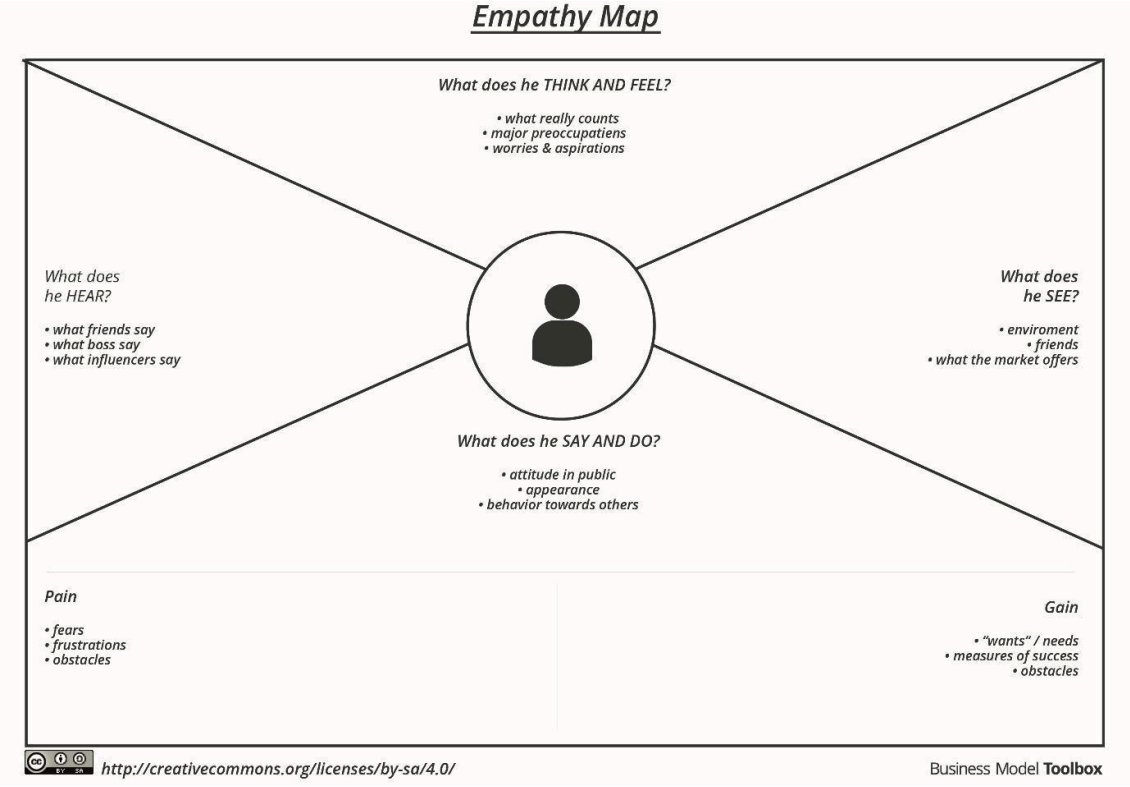

Date	20 October 2026
Team ID	Individual (Abdul Khadarvali)
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration Guide
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it.
The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map Canvas: Employee Raise Issue – ServiceNow

Target Persona: Enterprise Employee (`Requester` / `sys_user`) reporting workplace, IT, or HR issues (SkillWallet Project Overview):

Empathy Quadrant	Discovered User Insight (Enterprise Employee)	ServiceNow Feature Implemented in Project
Think & Feel / Hear	Employees feel blocked during VPN, laptop, server, or password outages and hear support teams asking for missing details or ticket IDs.	**Phases 1 & 2:** `Employee Center` Scoped App and auto-numbered `Employee raises issue` table with 8 standardized fields.
See / Say & Do	Employees see unstructured email delays and want a single self-service portal button that opens a guided issue-reporting form.	**Phases 4, 5 & 6:** `Requesting portal` (`/employee_request`), 6*6 grid widgets (`Commercial widget` & `Link redirect`), and `Raise Employee Issue` Record Producer.
Pain → Gain	Eliminates incomplete submissions, mismatched categories, and lack of status visibility across IT and HR support queues.	**Phase 3 & 7:** UI Policies (mandatory `Short description` on `New`; read-only `Number`) and `Category` → `Subcategory` dependency.
