Project Design Phase
Problem – Solution Fit Template

Date	26 October 2026
Team ID	Individual (Abdul Khadarvali)
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration Guide
Maximum Marks	2 Marks

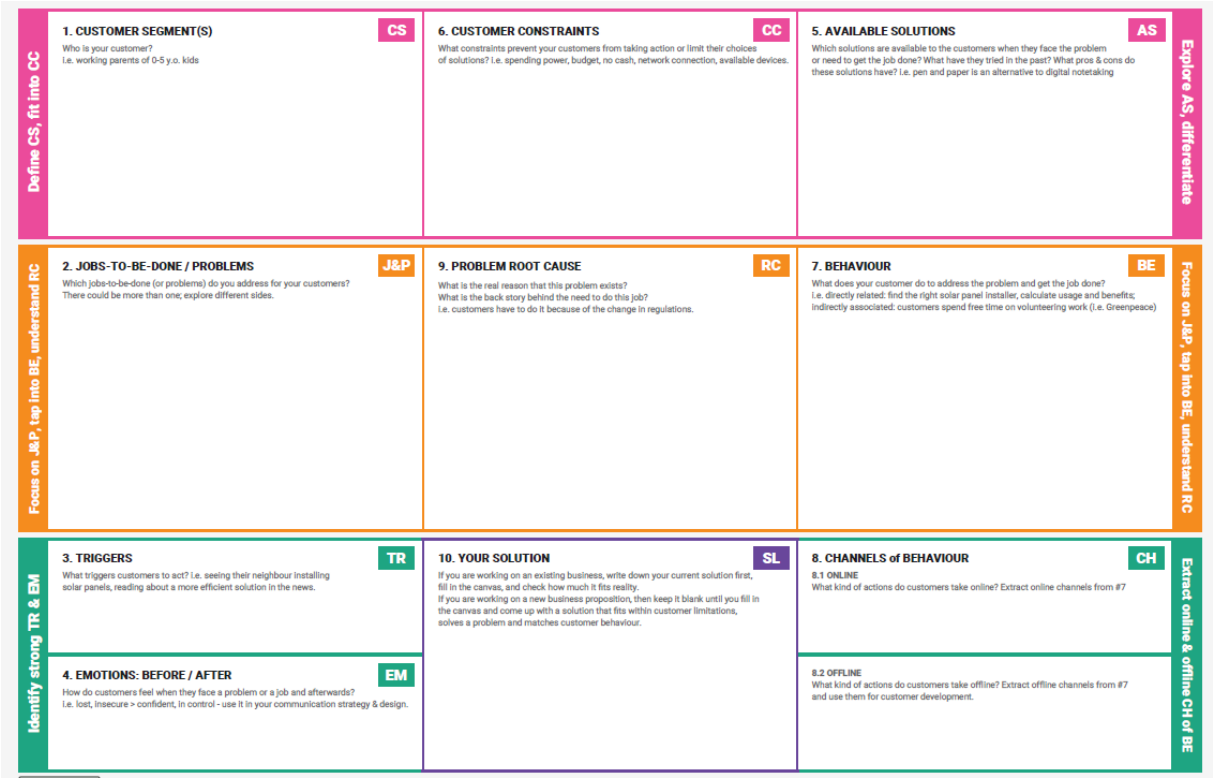

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ Understand the existing situation in order to improve it for your target group.

Problem – Solution Fit Canvas: Employee Raise Issue System (ServiceNow)

Completed 10-block Problem–Solution Fit Canvas mapped to the [Employee Raise Issue – Record Producer & Service Portal Integration] project:

Problem Dimension	Customer Limitation / Root Cause	Realized ServiceNow Solution Fit
Unstructured Intake (CS, AS, BE)	Employees send informal emails missing categories or summaries because backend tables are not user-friendly.	**Service Portal + Record Producer (Phases 4–6):** `/employee_request` portal with 6*6 grid widgets routing to the 5-variable `Raise Employee Issue` form.
Data Quality & Tampering (CC, RC)	Support teams waste time clarifying blank descriptions, mismatched subcategories, or altered ticket IDs.	**UI Policies & Dependency (Phase 3):** Mandatory `Short description` on `New`, Read-only `Number`, and 4-pair `Category → Subcategory` dependency.
Status Visibility & Triage (TR, EM, CH)	Employees have zero visibility into ticket progress, and HR/IT teams manually copy email threads.	**Scoped Table & Lifecycle (Phases 1, 2 & 7):** Auto-numbered `Employee raises issue` table tracking `State` (`New` to `Closed`), `Priority`, and `Assignment Group`.
