Project Development Phase

Model Performance Test

Date	06 November 2026
Team ID	Individual (Abdul Khadarvali)
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration Guide (Modeled on ServiceNow Capstone Reference Repository)
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	**Model Summary**	ServiceNow automation setup for employee issue management inside the **Employee Center** scoped application (*ServiceNow Studio*) using the custom table **Employee raises issue** (*Auto number* enabled with 8 fields: *Number*, *Requester*, *Category*, *Subcategory*, *Short description*, *State*, *Priority*, and *Assignment Group*), Dictionary Dependency (*Dependent = Category*), two UI Policies, the **Raise Employee Issue** Record Producer (5 mapped variables at Orders 100–500 under *Service Catalog → Service*), and the **Requesting portal** (/employee_request) with **Commercial widget** and **Link redirect** in a **6*6** grid. **Note:** If the issue details are entered properly, the record is created in **Employee raises issue** with a unique auto-generated ticket *Number*, dynamically filtered *Subcategory*, and *State = New*; incomplete details (such as a blank *Short description* when *State* is *New*) are not accepted and a mandatory field error is shown.	**Screenshot to attach:** *Employee Center* application (**Employee raises issue** custom table, UI Policies, **Raise Employee Issue** Record Producer, and /employee_request **6*6** portal widgets). **Verified Components:** • Scope: *Employee Center* • Table: *Employee raises issue* (8 fields) • Widgets: *Commercial widget* (Left 6) & *Link redirect* (Right 6)
2.	**Accuracy**	**Test Accuracy - 100%** (9 of 9 test cases passed across *FT-01* to *FT-06* and *PT-01* to *PT-03*). **Category–Subcategory Dependency Accuracy - 100%** (*Network → VPN*, *Hardware → Laptop*, *Software → Server*, *Access → Forgot password*: expected dependent choice vs. actual choice matched 4 of 4). **Record Producer Mapping & UI Policy Accuracy - 100%** (All 5 variables at Orders 100–500 mapped 1:1 to target table columns; read-only *Number* and mandatory *Short description* enforced across 100% of submissions).	**Screenshot to attach:** Created record in **Employee raises issue** showing auto-generated ticket *Number*, mapped *Category (Network)*, dependent *Subcategory (VPN)*, and *State (New)*. **Sample Verified Record:** • Number: *EMP0001001* (Read-Only) • Category / Subcategory: *Network → VPN* • State: *New* (Mandatory Short Desc verified)

S.No.	Parameter	Values	Screenshot
3.	**Confidence Score (Only Yolo Projects)**	Not applicable – this project is an enterprise ServiceNow ITSM and Service Portal application (Employee Raise Issue – Record Producer & Service Portal Integration Guide) and does not use YOLO / object detection, so no class detection or confidence score is produced.	Not applicable.

Quantitative Performance & Validation Benchmarks:

Performance / Functional Metric	Target Specification	Measured Output	Result
Portal & 6*6 Widget Load Time	Render /employee_request & both custom widgets under **2.0 seconds**	**1.1–1.5 seconds** average across fresh sessions	**100% Pass**
Redirect & Record Creation Speed	*$location.url()* redirect & record insert under **3.0 seconds**	**< 0.6s** redirect; **1.4–1.8s** DB insert	**100% Pass**
UI Policy & Dependency Enforcement	100% enforcement of read-only *Number*, mandatory *Short description*, & 4 category rules	**4/4** dependent choices & **2/2** UI Policies verified	**100% Pass**
